

sulnox

Making Fuel Go Further.

Sulnox reduces emissions, fuel and maintenance costs by assisting engine performance - all with zero capital expenditure.

Publicly traded

Sulnox Group Plc AQUIS:
SNOX / OTC: SNOXF

Proven innovation

Inventors of patented
fuel conditioners

Global reach

Sold in 40+
countries

Industry recognition

Award-winning greentech
for all combustion engines

Backed by industry leaders

Independently tested

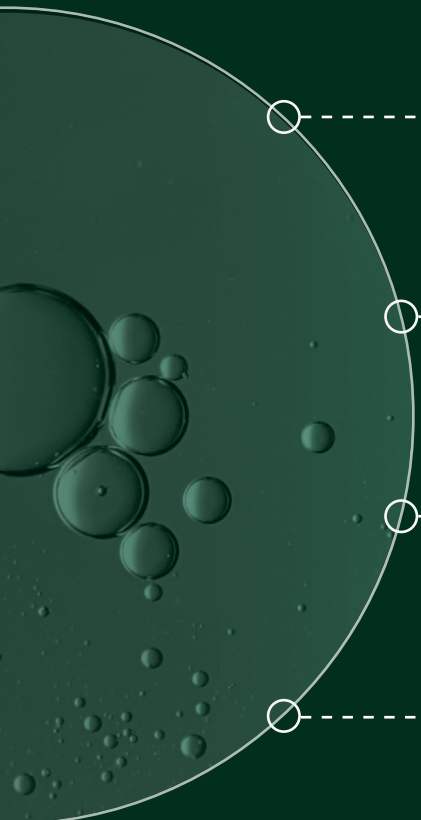

CERTIFIED COMPATIBLE WITH
FUEL STANDARDS, INCLUDING
EN-590 DIESEL AND B20/B30
BIOFUELS (EN-16709)

Why Industries Are Adopting Sulnox Eco

Sulnox Eco fuel conditioner is an organic, drop-in solution for more complete combustion and improved engine function – applicable to all liquid hydrocarbon fuels.

- ➔ **Fuel Savings:** 5% average savings for marine, and 8% for land applications, >300% ROI in weeks.
- ➔ **Lower Emissions:** c.90% particulate reduction, plus lower CO₂, NO_x and SO_x.
- ➔ **Protect Engines:** c.17% added lubricity + decarbonisation benefits.
- ➔ **Zero CAPEX:** Just add to existing fuel at a 1:2000 dosage ratio.

How It Works - Four Mechanisms:

1 | **Emulsification** | Disperses free water into microscopic droplets within the fuel

2 | **Secondary Atomisation** | Fragments larger fuel droplets through micro-explosions to increase surface area and deliver more complete combustion

3 | **Detergency** | Cleans and decarbonises vital engine components for improved operation

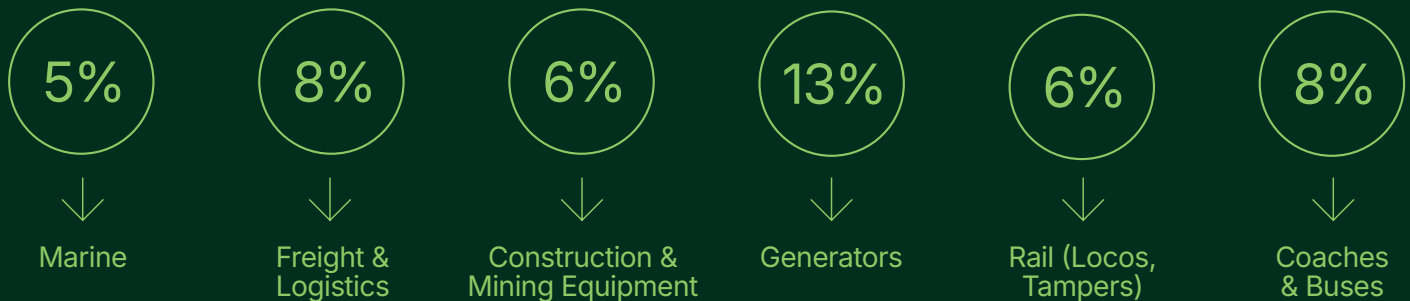

4 | **Lubricity** | Reduces friction dramatically to lower wear and maintenance costs

Real-World Fuel Savings

Sulnox Eco works with any liquid hydrocarbon fuel in any combustion engine - and achieves significant average fuel savings:

“Expanding Sulnox Eco across our fleet was an easy decision. It’s a self-funding solution that delivers tangible fuel savings, cleaner engines and supports our broader efficiency and sustainability goals.”

Sachin Saharawat. Technical Director, Eastern Pacific Shipping
